

As a member of the Erotic Service Providers Union you will be on the forefront of

- Demanding the complete decriminalization of prostitution,
- Actions that empower erotic laborers to be self determined,
- Political campaigns that lobby for legislation which upholds the rights of all erotic service providers and our support staff,
- Organizing on a local, national and international level.
- Negotiations for our wages and work conditions independently or collectively without suffering state sponsored violence, such as being arrested, exploited or ghettoized,
- Campaigns to eliminate all forms of discrimination against our occupations and raise our status to the public

Erotic Service Providers Union shall organize with organized labor, employing labor principles and strategies to form an industrial union for all erotic laborers so we can be in charge of our own destinies.

We will work to form coalitions locally, nationally and internationally with those who understand the interconnectedness of our struggle with all struggles for social and economic justice.

We shall promote professional and personal privacy so we aren't forced to compromise ourselves in order to fight for our rights.

We shall demand and expect that governments, politicians, along with community and labor organizations take progressive stances, and put our organization at the center of any discussion about our industry.

We shall welcome Erotic Service Providers into our organization regardless of documentation status, country of origin, gender identity, legal employment status or lack thereof.
